Upgrades to SpeX's Motor, Temperature Control System. \$30K.

The SpeX array and readout electronic will be upgraded in 2012. However, this upgrade proposal does not include any funds to upgrapde SpeX's instrument control hardware. This hardware over 12 years old and will require replacement when Spex's array are upgraded. Hardware includes: one computer, motor controllers, ethernet based IO controller, three temperature controller/monitors, ten motors, two electronic boxes, and power supplies.

5. WTI IPS-800 AC power control unit.

6. Motors

Replace SM3410-V, cost is approx \$1200.

Motion Control Made Easy!

IP65 Rated Sealed Stepper Motors

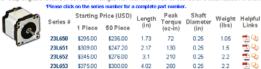

Anaheim Automation, Inc. provides a line of High-Torque Stepper Motors that are IP65 rated for harsh environments. These IP65 rated motors meet the splash proof requirements of most applications with humid or damp environments. Sealed shafts further protect the motor, which allows for longer life cycles. These motors are available in NEMA frame sizes 17 to 42, the smallest beginning with 38 ounce inches of torque, to the largest with up to 5,700 cunce inches of torque! The IP65 Sealed Stepper Motor series is an excellent choice for lab automation, biotech, and semiconductor automation equipment, just to name a few. Special shaft modifications are available, as well as cable, connector and encoder adders, making Anaheim Automation's IP65 Sealed Stepper Motor line the most comprehensive from a single source.

The 17L85 Sealed Stepper Motor series is offered in three stack versions, with torque rated from 38 to 83 ounce inches. These high-torque motors are 1.8° step angle, available in several windings, with four lead wires as standard. Customization is available.

	23Y652	\$108.80	\$78.40	3	262	0.25	221	7± Q

The 23L65 Sealed Stepper Motor series is offered in four stack versions, with torque rated from 55 to 320 ounce inches. These high-torque motors are 1.8" step angle, available in several windings, with four lead wires as standard. Customization is available.

34Y65

cal 34Y85 Sealed Stepper Motor series is offered in four stack versions, with torque rated from 487 to 1,700 ounce inches. These motors pped with a conduit box as standard. Customization is available.

The powerful 34N85 Sealed Stepper Motor series is offered in four stack versions, with torque rated from 850 to 2,180 ounce inches. These motors are 1.8" with a conduit box as standard. Customization is available.

Please click on the series number for a complete part number

34K65

The 34K85 Sealed Stepper Motor series is the most powerful in the 34 frame size, and is offered in four stack versions, with torque rated from 800 to 2725 ourse inches. These motors are 1.8" with a conduit box as standard. Customization is available.

7. Analog Condition/Comparator Board

The analog signal from the Hall Effect sensors used by the mechanism requires conditioning prior to being sample in an A/D or feed into an TTL input. A custom board by the IRTF EE will be build. Estimated cost for board manufacture and parts is \$600 per board.

8. Three electronic chassis, and power supplies

9. Temperature Controllers

U.S. And Canada Only Shipping

At this time, we cannot ship or bill web orders outside of the United States and Canada. We cannot accept credit cards issued from a bank outside of the U.S. or Canada. If you are outside of the U.S. or Canada and would like export prices or order information, please contact your local sales representative by visiting http://www.lakeshore.com/com/sr.html.

<u>Lead Time</u>: Lake Shore delivers most products from stock and they are shipped within one week (5 business days). f products are not in stock, the typical lead times are as follows. Large quantity orders can effect lead time. Please call (614-891-2244) or e-mail for the most up to date lead time.

Sales Tax: Lake Shore currently collects sales tax in the following states: AZ, CA, FL, IN, OH, SC WA
