Custom windings are available on select SmartMotors. These special windings allow SmartMotors to achieve higher speeds or greater torque.

Custom shaft lengths and diameters are available on select SmartMotors. Flats and keyways are common options found on motor shafts. SmartMotors can be purchased with various versions of these shaft modifications.

Torque vs. Speed curve data is derived under dynamometer testing using a 48 VDC battery supply at an ambient temperature of 27°C (80.6°F).

Connector kits and cable options are available.

SmartMotor™ servos have CE certification.

Brushless	Rated Power	Maximum Speed (RPM)	Operating Voltage	Continuous Torque (N-m)	Peak Torque (N-m)
Yes	-	5060	9	45	180
