

Motion Control Made Easy!

IP65 Rated Sealed Stepper Motors

Anaheim Automation, Inc. provides a line of High-Torque Stepper Motors that are IP65 rated for harsh environments. These IP65 rated motors meet the splash proof requirements of most applications with humid or damp environments. Sealed shafts further protect the motor, which allows for longer life cycles. These motors are available in NEMA frame sizes 17 to 42, the smallest beginning with 38 ounce inches of torque, to the largest with up to 5,700 ounce inches of torque! The IP65 Sealed Stepper Motor series is an excellent choice for lab automation, biotech, and semiconductor automation equipment, just to name a few. Special shaft modifications are available, as well as cable, connector and encoder adders, making Anaheim Automation's IP65 Sealed Stepper Motor line the most comprehensive from a single source.

17L65

The 17L65 Sealed Stepper Motor series is offered in three stack versions, with torque rated from 38 to 83 ounce inches. These high-torque motors are 1.8° step angle, available in several windings, with four lead wires as standard. Customization is available.
